# GLV2000 Control Center Operating Handbook

# FlightSim Developers

# GLV2000 Control Center

The Control Center lists all of the aircraft available in Flight Simulator, along with all of the aircraft that are configured to use the GLV2000.

# The GLV2000 Control Center

# Introduction

The **Control Center** is a configuration utility for the GLV2000 that will allow you to perform various tasks to make this unique addon as user friendly and easy to configure as possible. It can perform the following tasks:

- Configure your installed aircraft for Microsoft Flight Simulator<sup>®</sup> (MSFS) to use the panel instrument and systems, or restore them back to their original configuration.
- Customize the speed and performance data for each aircraft installed.
- Review and modify the global preference settings for the system.

The **Control Center** is simple and easy to operate. The following handbook outlines the steps and procedures for the proper use of this utility.

The **Control Center** is a pre-flight utility. Any changes made using this utility will be reflected the next time **MSFS** is started.

#### Contents

This manual is presented in nine sections:

1. Getting Started	Page	3
2. Startup and Initialization	Page	7
3. Finding Files and Data	Page	9
4. Aircraft Configuration	Page	10
5. Reference/Performance Data	Page	16
6. Global Preferences	Page	20
7. Support	Page	21
8. Index	Page	23
9. End User License Agreement (EULA)	Page	24

# **KEYWORDS**

Name	Description	Page
Add Aircraft Wizard	Utility to find a GPS unit in a panel not found in the automatic process	14
Aircraft Directory	An individual aircraft's folder in the MSFS directory structure	17
Backup File	A copy of an aircraft's original panel.cfg file	10
Configured Aircraft List	List on the Program <b>GUI</b> that displays the aircraft presently configured	5
Control Center	The ControlCenter.exe program, detailed here.	
Global Preferences	User controlled options for display and functionality of the MFD	
Global Settings List	List on the Program GUI that displays the Global Preferences	
GLV2000	The name of this system	
GUI	Graphic User Interface. The dialog controls for the <b>Control Center</b> .	4
MFD	The FSDevGLV2000!GLV2000 gauge installed into a Panel File	
Model File	The G2KPnl.cfg file containing the <b>MFD</b> , used as a model for configuring an aircraft	10
MSFS	Microsoft Flight Simulator	
Non-configured Aircraft List	List on the Program <b>GUI</b> that displays the aircraft <b>not</b> presently configured	
Panel File	A panel.cfg file	
Panel Window	A 2D panel window. Sometimes the main panel, but usually a popup window	
РОН	Pilot Operating Handbook file Pilot Handbook.pdf for the GLV2000	
Program	The Control Center program (ControlCenter.exe)	
Project Directory	The directory within MSFS containing files used by the GLV2000	9
Reference Speeds List	List on the Program <b>GUI</b> that displays an aircraft's performance speeds	16
VNAV	Vertical Navigation. The GLV2000 control over altitude in given situations	

# 1. Getting Started

#### This section includes:

- 1. How it Works page 4
- 2. Startup and Initialization page 7
- 3. Finding Files and Data- page 8
- 4. Aircraft Configuration page 10
- 5. Reference/Performance Data- page 16

6. Global Preferences - page 20

Overview of how the program works

How to start the program and how it initializes Where to find the information you are need How to configure/reconfigure your MSFS aircraft Where to find the data used by the system and what it means Global preferences and how to change them

# 1. How it Works

The following will help you familiarize yourself with the **GUI** in order to help you to find what you are looking for.

# 1.1.1 GUI DIAGRAM

# 1.1.2 Getting Around the GUI

There are three main functions of the **Control Center**, covered here in sections:

1.1.2a	Aircraft Configuration	Page 5
1.1.2b	Reference Speed Review and Modification	Page 6
1 1 0		

1.1.2c Global Preferences Review and Modification Page 6

### 1.1.2a Aircraft Configuration

The two large data fields on the left of the **GUI** list the aircraft that are available for use in **MSFS**. On the left, aircraft that are not presently configured for the **GLV2000** are listed. On the right, the aircraft that are presently configured. Both list fields are labeled respectively (Fig. 2).

Non Configured Aircraft	Configured Aircraft
Airbus A321 AirCreation Trike Ultralight Boeing 737-800 Boeing 747-400 Bombardier CRJ700 Cessna C208B Grand Caravan de Havilland Beaver DHC2 DG Flugzeugbau DG-808S Douglas DC-3 Piper PA-30 Twin Comanche Extra 300S Boeing F/A-18 Cirrus VLJ Lockheed P-38J Lockheed P-38L Beechcraft Bonanza Northrop / McDonnell Douglas F-2 Commander 115TC Cessna FSD C337D	Beechcraft Baron 58 Beechcraft King Air 350 Cessna C172SP Skyhawk Grumman Goose G21A
Add	Remove

Figure 1b

Buttons to 'Add' (*Fig. 1a No. 3 - Pg. 4*) or 'Remove' (*Fig. 1a No. 4 - Pg. 4*) aircraft to/from the configuration list are found below, and are enabled when a selection on the Non-Configured Aircraft (Add) or Configured Aircraft (Remove) is made. More on aircraft configuration can be found in section *4. Aircraft Configuration* /

4.3 Modification Procedures on page 12.

# 1.1.2b Reference Speed Review and Modification

When an aircraft on the Configured Aircraft List is selected, it's reference speed data is displayed on the Reference Speeds List.

A *Modify* button is located directly underneath, which is enabled when one of the reference speeds is selected with the mouse. This button, described in section 5.4 Data Modification on page 17.

Configured Aircraft Reference Speeds					
Beechcraft Baron 58 Beechcraft King Air 350 Cessna C172SP Skyhawk Grumman Goose G21A	Stall Speed Clean = 96 Kts Stall Speed Flaps = 76 Kts Cruise Speed = 300 Kts Maneuver Speed = 101 Kts Max Speed = 263 Kts Autopilot VS = 1800 Kts				
	Modify Defaults				

Figure 1c

### 1.1.2c Global Preferences Review and Modification

The global preferences used by the MFD, for display and functionality, are listed here from the stored data on your computer.

A *Modify* button is located directly underneath that will allow you to change any of these preferences. See section 6.4 Global Preference Modification Procedures on page 20.

	System Preferences

		Figur	e 2a	L Dilot L	landhook ndf	1-37117-36111-1-3617	Λ.

When the **Program** starts the initialization process begins, and the status bar annunciates its progress.

Figure 2b

The **Control Center** scans your **Aircraft Directory** for MSFS. It looks for aircraft that are already configured to use the **MFD**, and those that are not. This determination is made by a quick scan of each aircraft's **Panel File**. Once a determination is made, the configured aircraft are added to the **Configured Aircraft List**, and the others to the **Non-Configured Aircraft List**.

When the initialization process is complete the data fields are filled and the program is ready for user input.

Figure 2c

# 3. Finding Files and Data

# 3.1 FILES ON YOUR HARD DRIVE

# 3.1.1 File Definitions

>	ControlCenter.exe	The Control Center program
	ControlCenterError.txt	Error log maintained in case of problems or errors in the Control Center program
PDF	Control Center Handbood.pdf	This file.
	GLV2000.cfg	Configuration file for global settings and data used by the GLV2000 MFD gauge. This is the <b>primary</b> data source.

# 3.2 REGISTRY DATA

Installation data and backup MFD preferences and settings are maintained in the following registry key:

HKEY\_CURRENT\_USER\Software\FlightSim Developers\GLV2000

The system registry is the *secondary*, or *backup* data source.

This key contains the subkeys Version 1 (this software version) and Data. The Data key is the backup record for you global settings and preferences. The main archive for this data is the GLV2000.cfg file found in the **Project Directory**.

# 4. Aircraft Configuration

# 4.1 SCOPE OF THIS SECTION

This section will describe the step by step procedures necessary to configure the aircraft of your choice to use the **MFD**, or to return these aircraft to their original configuration.

# 4.2 HOW IT WORKS

Once the **Program** has initialized, per section 2. Startup and Initialization on page 7, a determination has already been made as to which aircraft are configured (*see section 4.2.1 How aircraft Are Configured*), and which are not. At this time both the 'Add' (*Fig. 1a, No. 3 - Pg. 4*) and 'Remove' (*Fig. 1a No. 4 - Pg. 4*) buttons are disabled. Using your mouse to select an item on the **Non-Configured Aircraft List** will enable the 'Add' button.

#### 4.2.1 How aircraft Are Configured

When an aircraft is first configured by the **Program** for the first time, a **Backup File** of the original configuration is created in a file called G2KBk.cfg, based on the **Panel File** that it finds in that aircraft's folder.

Beech_King_Air_350     Beech_King_Air_350     Decision of the second secon	t.bmp
sound	
S PANEL.CFG	

If the present GPS is the default **MSFS** GPS 500 unit, the size ration (width ÷ height) is the same as the **MFD**. In this case, the **Program** will also swap the default **MSFS** GPS 500 unit with the **MFD** wherever it is found when creating the G2KPnI.cfg file. This is the file that will be used as a **Model File** for configuring the aircraft for the **MFD**.

Once both the G2KBk.cfg **Backup File** and the G2KPnl.cfg new configuration **Model File** are both created, the **Program** can configure, or reconfigure the aircraft to its original form as you desire. If the backup and model files were created as a result of pressing the 'Add' button, the **Program** will go ahead and configure the aircraft by overwriting the aircraft's **Panel File** with the data in the **Model File**.

Thereafter, configuring or reconfiguring the aircraft is a simple matter for the Program to overwrite the Panel File with the **Backup File** or the **Model File**.

# 4.2.1a User Revisions and Modifications

If there are adjustments or modifications that you want to make outside of the **GLV2000 MFD**, or if you simply want to modify some aspects of the configuration yourself, make sure to save your changes in the **Model File**. Then you can be assured that the modification will always be there every time you use the **Program** to change the aircraft's panel configuration.

# 4.3 MODIFICATION PROCEDURES

The procedure itself is quite simple:

- Select one of the aircraft in the Non-Configured Aircraft List. The aircraft will be highlighted and the 'Add' button will be enabled.
- 2. Press the 'Add' button.

# 4.3.1 Normal Modification

If the **Program** can identify the GPS unit, the process described in section 4.2.1 How aircraft Are Configured (*page 10*) will configure the selected aircraft, after which the Program will re-initialize, as described in *section 2. Startup and Initialization on page 7.* The Status Bar will indicate the progress of this process.

FlightSim Developers

Figure 4b

The selected aircraft should now appear on the **Configured Aircraft List**.

If not, you will have the option of using the **Add Aircraft Wizard**. See section 4.3.2 Add Aircraft Wizard, below.

Figure 4c

### 4.3.2 Add Aircraft Wizard

If the **Program** fails to identify the panel's GPS unit, this message will appear.

Select "Yes" if you want to launch the **Add Aircraft Wizard**, or "No" cancel the configuration.

3

The Add Aircraft Wizard (*Fig. 4e*) takes the Panel Window data described in *section 4.2.1 How aircraft Are Configured on page 10*, and displays the available Panel Windows in the left hand field. The gauges installed on that panel are displayed on the right.

Select a window on the left with your mouse. Those gauges will be displayed. If you find the GPS gauge click on it on the right hand list, and the 'Next' button will be enabled. Just click 'Next" and the configuration process described in *section 4.2.1 How aircraft Are Configured on page 10*.

#### Figure 4e

#### 5. Reference/Performance Data

This is the data found on the **Reference Speeds List** (*Fig. 1a No. 5*). It is used by the GLV2000 MFD for operating speed warnings and calculations, particularly for the system's **VNAV** functions.

# 5.1 SCOPE OF THIS SECTION

This section will define what this data is for, the source of this data, and how it is used. It is also to show you how you can modify these values.

# 5.2 PURPOSE AND USAGE OF THIS DATA

The Speed Annunciation information on the **MFD** and the Audible Speed Annunciation ("*Check Speed message*"), as described in *section 2.12.3a on page 79* of the **POH**, require data on the following aircraft performance specifications:

- 1. Stall speed clean (no flaps extended)
- 2. Stall speed with flaps extended
- 3. Recommended cruise speed
- 4. Maneuver speed  $(V_A)$
- 5. Maximum speed  $(V_{MO})$
- 6. Autopilot recommended climb rate, in feet per minute

Without this data, the system cannot make the necessary calculations to utilize these features in the MFD.

# 5.3 DATA SOURCE

The performance and speed information is extrapolated from the flight dynamics data from the aircraft's aircraft.cfg file.

👢 SimObjects	*	Name
👢 Airplanes		👢 model
👢 Airbus_A321		
l Aircreation_582SL		👃 panel
<b>B</b> 737_800		👃 sound
 <b>b</b> 747_400		👃 soundai
beech_baron_58		👢 Texture
		👢 Texture.1
Beech_King_Air_350		👢 Texture.2
L Bombardier_CRJ_700		L Texture.3
👢 C172		aircraft.cfg
L C208B		

This data, for each individual plane, is stored in the GLV2000.cfg file that is created in its folder within the Flight Simulator aircraft directory structure. This program creates this file once an aircraft is selected for configurations. It is editable by this program, or by any text editor like Notepad.

# 5.4 DATA MODIFICATION

To modify any of the reference data that was created for the aircraft, just clock on the data with your mouse. The 'Modify' (*Fig. 1a No. 6 pg. 4*) and 'Default" (*Fig. 1a No. 7 pg. 4*) buttons will be enabled.

If the 'Modify' button is pressed, the Modify Data dialog will appear, as described in *section 5.4.1 Modify Data* Dialog below.

If the 'Defaults' button is pressed, any changes that may have been made will be overwritten, and the original values created by the Program when the aircraft was originally configured will be restored.

### 5.4.1 Modify Data Dialog

When the dialog appears, use the up or down arrow keys to change the value +/-. Most values have limitations in terms of how high or low these values will go.

Press the 'Enter' key to change the value, or 'Cancel' to abort the change.

Change Value				
FlightSim Develope	rs			
GLV2000 Control Center				
Change the value of t	the reference speed you have selected.			
	Stall Speed Flaps 76 - +			
Press enter to change the value or Cancel to keep original value.				
	Enter Cancel			

These values can also be changed using the **MFD** in **MSFS**. See the **POH** section 1.1.2.1 Setting *Preferences on pages 11 - 13* for more information.

#### 5.4.2 Aircraft Range

The published range of the aircraft is, unfortunately, not part of the Flight Simulator data incorporated in the plane's aircraft.cfg file. This specification is very relevant to fuel management and flight planning. If this figure is not available in the individual plane's GLV2000.cfg file you can add it yourself.

Select the aircraft range, in increments of 100 nautical miles, and then press Enter.

Change Value		X

### 6. Global Preferences

These values are displayed on the **System Preference List** (*Fig. 1a, No 8-pg. 4*), and in the **MFD** (see the **POH** section 1.1.2.1 Setting Preferences - pg. 11).

# 6.1 SCOPE OF THIS SECTION

This section describes how to review and change the **Global Preferences** for the **MFD** using this **Program**.

### 6.2 PURPOSE OF GLOBAL PREFERENCES DATA

**Global Preferences** are the display values and operating parameters, which are user selectable, that are stored on your system for use in the **MFD** while running in **MSFS**.

### 6.3 SOURCE OF THIS DATA

See section 3. Finding Files and Data on page 9 for complete details.

#### 6.4 GLOBAL PREFERENCE MODIFICATION PROCEDURES

Changing **Global Preferences** is a simple operation. Simply use your mouse to select one of the data items on the **System Preference List** (*Fig. 1a, No 8-pg. 4*). This will enable the 'Modify' button (*Fig. 1a, No 9-pg. 4*).

Press the 'Modify' button and the Modify Data dialog will appear, as described in *section 5.4.1 Modify Data* Dialog *on page 18.* 

These values can also be changed using the **MFD** in **MSFS**. See the **POH** section 1.1.2.1 Setting Preferences on pages 11 - 13 for more information.

# Support

FlightSim Developers (FSD) has been a leading developer of quality Flight Simulator addons, dating back to 1992 and the **MSFS** 5.1 days. We provide ourselves with our timely and effective support and the advanced diagnostics built into our software that enables useful error reporting. This enables us to help you more effectively.

# Error Handling

If an error occurs in the **Program** during operation it will be logged in the ControlCenterError.txt file described in section *3.1 Files on your Hard Drive* on page 9. If you encounter some kind of problem and need to get help from our Support staff, it is a good idea to copy and paste the information from this text file into your email to us. It can be very useful in determining the problems.

### CONTACTING SUPPORT

Just go to our website at <u>http://www.fsd-international.com</u> and select the *Support* link:

 If you are receiving an error number you may be able to find a quick answer here. Just type the number in the box and press Submit. \*

When sending support requests please provide a full description of the problem you are encountering so that we may provide you with timely and effective support.

Technical Support

If the FAQs and help screens did not resolve your problem, send us this inquiry form. We will respond by return e-mail. Therefore, make certain that you have completed all of the required fields, particularly your return e-mail address. Otherwise the information we give you may not be accurate.

Response time is typically within 2 hours. However, sometimes circumstances will not allow this. Therefore, please allow 24 hours for a response.

\*\*We cannot guarantee a response will get to you if you are using a free e-mail service such as Yahoo, hotmail or Juno. These services are notorious for deleting mail before you receive it, or just plain losing mail. Service can only be guaranteed if you are using a standard POP3 e-mail account from a reputable Internet Service Provider.

Please provide us with some important information:

# End User License Agreement

# IMPORTANT-READ CAREFULLY: BY INSTALLING THIS SOFTWARE YOU ARE AGREEING TO THE TERMS SPECIFIED BELOW!

This FSD International, Inc. End User License Agreement (EULA) is a legal agreement between you (either an individual or a single entity) and FSD International, Inc., for the software product. "SOFTWARE PRODUCT" is hereby identified as, and includes, any or all computer software, associated media, printed materials, and "online" or electronic documentation associated with it. By installing, copying, or otherwise using the SOFTWARE PRODUCT, you agree to be bound by the terms of this EULA. If you do not agree to the terms of this EULA, do not install or use the SOFTWARE PRODUCT.

#### SOFTWARE PRODUCT LICENSE

The SOFTWARE PRODUCT is protected by copyright laws and international copyright treaties, as well as other intellectual property laws and treaties. The SOFTWARE PRODUCT is licensed, not sold. FSD International, Inc. maintains ownership of the software.

#### 1. GRANT OF LICENSE.

#### -Installation and usage

FSD International, Inc. grants to you the rights to install and use the software, for your own personal use only, on one (1) computer. Installation on a second computer or any number of additional computers is prohibited. The license may be transferred to another computer with permission from FSD International, Inc. provided you can demonstrate that the software has first been removed from the original computer. FSD International, Inc. can provide you with a utility which will remove all files and the license from the original computer and create a data file demonstrating this. You may inquire with FSD International, Inc. regarding this by contacting us in the manner described below under **Contacting FSD International, Inc.**. Other arrangements on subsequent to evaluation by FSD International, Inc. can also be made, and inquires are welcome.

#### - Reproduction and Distribution.

You may NOT reproduce or distribute any number of copies of the SOFTWARE PRODUCT. Webmasters may NOT upload the SOFTWARE PRODUCT to their web sites, or distribute the SOFTWARE PRODUCT in any way. At no time may the SOFTWARE PRODUCT be placed on a web site, newsgroup, Internet mailing list, or Bulletin Board (BBS), or copy/redistribute the software and documentation by any other means.

#### 2. DESCRIPTION OF OTHER RIGHTS AND LIMITATIONS.

#### -Limitations on Reverse Engineering, Decompilation, and Disassembly.

You may not reverse engineer, decompile, or disassemble the SOFTWARE PRODUCT.

#### - Use of "key generator" or other license "hacking" tools.

Use of any such utility or tool on your system, designed to circumvent the FSD International, Inc. license/license system for this or any other FSD International, Inc. aircraft shall be considered a violation of this agreement and cause for termination of this license agreement and all other FSD International, Inc. licenses.-

#### Separation of Components.

The SOFTWARE PRODUCT is licensed as a single product. Its component parts may not be separated for use on more than one computer.

#### - Software Transfer.

You may not transfer this license without the specific permission of FSD International, Inc..

# - Termination.

Without prejudice to any other rights, FSD International, Inc. may terminate this EULA if you fail to comply with the terms and conditions of this EULA. In such event, you must destroy all copies of the SOFTWARE PRODUCT and all of its component parts.

#### 3. COPYRIGHT

All title and copyrights in and to the SOFTWARE PRODUCT (including but not limited to any images, photographs, animations, video, audio, music, text, and "applets" incorporated into the SOFTWARE PRODUCT) and any copies of the SOFTWARE PRODUCT are owned by FSD International, Inc.. The SOFTWARE PRODUCT is protected by copyright laws and international treaty provisions. Therefore, you must treat the SOFTWARE PRODUCT like any other copyrighted material except that you may install the SOFTWARE PRODUCT on a single computer provided you keep the original solely for backup or archival purposes.

#### 4. U.S. GOVERNMENT RESTRICTED RIGHTS

The SOFTWARE PRODUCT and documentation are provided with RESTRICTED RIGHTS. Use, duplication, or disclosure by the Government is subject to restrictions as set forth in subparagraph (c)(1)(ii) of the Rights in Technical Data and Computer Software clause at DFARS 252.227-7013 or subparagraphs (c)(1) and (2) of the Commercial Computer Software-Restricted Rights at 48 CFR 52.227-19, as applicable. Manufacturer is FSD International, Inc., Olathe, Kansas.

#### 5. MISCELLANEOUS

If you acquired this product in the United States, this EULA is governed by the laws of the State of Kansas.

If you acquired this product in Canada, this EULA is governed by the laws of the Province of Ontario, Canada. Each of the parties hereto irrevocably attorns to the jurisdiction of the courts of the Province of Ontario and further agrees to commence any litigation, which may arise hereunder in the courts located in the Judicial District of York, Province of Ontario.

If this product was acquired outside the United States, then local law may apply. Should you have any questions concerning this EULA, or if you may do so in the manner described below under Contacting FSD International, Inc.

#### 6. LIMITED WARRANTY

**NO WARRANTIES.** FSD International, Inc. expressly disclaims any warranty for the SOFTWARE PRODUCT. The SOFTWARE PRODUCT and any related documentation is provided "as is" without warranty of any kind, either express or implied, including, without limitation, the implied warranties or merchantability, fitness for a particular purpose, or non infringement. The entire risk arising out of use or performance of the SOFTWARE PRODUCT remains with you.

7. NO LIABILITY FOR DAMAGES. In no event shall FSD International, Inc. be liable for any damages whatsoever (including, without limitation, damages for loss of business profits, business interruption, loss of business information, or any other pecuniary loss) arising out of the use of or inability to use this FSD International, Inc. product, even if FSD International, Inc. has been advised of the possibility of such damages. Because some states /jurisdictions do not allow the exclusion or limitation of liability for consequential or incidental damages, the above limitation may not apply to you.

Any attempts to distribute or alter the files without permission of FSD International, Inc. will be considered an act of piracy and will be dealt with according to domestic, or as applicable, international law.

8. U.S. Government Restricted Rights. The Software is a "commercial item," as that term is defined at 48 C.F.R. 2.101 (OCT 1995), consisting of "commercial computer software" and "commercial computer software documentation," as such terms are used in 48 C.F.R. 12.212 (SEPT 1995). Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227-7202-1 through 227-7202-4 (JUNE 1995), all U.S. Government End Users acquire the Software with only those rights set forth herein.
